BLOWSION

01-02-580	Carbon Tank Holder - OEM/CF	99.95
01-02-581	Carbon Tank Holder - Small	99.95

Fed up with your fuel tank sliding around when doing aerials? The BlowSION lightweight tank holder glues in and cradles your tank in place stopping any potential tank dislodgements.

LIGHTWEIGHT CHARGING FLYWHEELS

01-04-208	Flywheel Charging Kaw	611.95
01-04-258	Flywheel Charging Yam	611.95

Released exclusively through BlowSION, the new 2013 Jetinetics lightened charging flywheels for Kawasaki and Yamaha. Tested and developed beyond the limits of most ordinary human DNA, we are proud to work with and now offer the latest creation from the PWC World's leading flywheel manufacturer. These are "THE" lightest charging flywheels ever offered to the PWC market.

BlowSION 8mm Billet Conical Washers

04-04-015	BlowSION Conical Washer- Black	16.65
04-04-016	BlowSION Conical Washer- Blue	16.65
04-04-017	BlowSION Conical Washer- Green	16.65
04-04-018	BlowSION Conical Washer- Orange	16.65
04-04-019	BlowSION Conical Washer- Red	16.65
04-04-020	BlowSION Conical Washer- Clear	16.65

Replace the brittle and breakable plastic nylon washers that are included with Rickter and many aftermarket hulls. Also popular for use as dressing up your dash when mounting the Cold Fusion electrical box bracket or the new BlowSION Turbulator chin pads.

BLOWSION 2014 NEW PRODUCTS

2014 Blowsion Adjustable Billet Handle Pole PN#03-04-235 Price: Blowsion.com

Introducing for 2014 the new Blowsion billet adjustable handle pole. In development and testing for over two years, this lightweight futuristic design incorporates every feature and request from not only the design group here at Blowsion, but feedback and testing as well from the top pros in racing, freeride and freestyle. This product was the definition of a team effort!

Constructed of billet aluminum throughout all its componentry, the Blowsion Billet handle pole features an exclusively designed and lightweight dual honeycomb shaped center extrusion. Combined with the lightweight billet machined ends that are manufactured using industry leading 5-axis technology, this system allows for ease of length adjustability on each end as well as superior clamping strength. Choose from multiple lengths of center extrusion allowing each rider to customize pole lengths from uber short to extended length taller riders.

Incorporating a completely new one-piece steering system, the Blowsion handle pole allows for a completely neutral handlebar pivot mount. This is the first "over the pivot" (OVP) steering system for the standup market. OVP steering enormously increases steering response and enables the rider to have a much more precise feel. Innovative new tapered bearings are used for increase lateral-load on the bars as well as a zirk fitting mounted into the steering so you can grease your steering bearings with ease. Under side mounting of pole and steering system is completely sanitized of leg-scarring bolts, nuts and mounting hardware.

Already have an aftermarket steering system? No worries- we have designed this new pole to accommodate exiting steering systems on the market. The Blowsion billet handle pole is the only handle pole supplied with a billet steering stop, a machined handle pole limiting rope fixture and is available in six different anodized color options for both the center extrusion, as well as the billet ends (Black, Red, Blue, Clear, Orange and Green). When outfitting your steering system for our new pole you can choose from a standard handlebar, or riser/straight bar option. Both Yamaha and Kawasaki Bushings included.

Add our exclusive and brand new 2014 Turbulator composite chin pad and you are ready to rip. Streamlined and lightweight with 10mm of lightweight foam padding to protect against painful face plants, the Blowsion 2014 Turbulator chin pad is available in these popular watercraft colors: Green, Black, Blue, Red, Orange, White, Red, and Yellow. One-off custom color special order requests also available with new designs and padding coming in 2014 that will blow you away.

All Blowsion handlepole products and components are 100% designed and manufactured in the USA. Sales and Shipping commence December 1st, 2013. Updated pricing, color options and more information will all be available at the Blowsion Handlepole website link.
